

## GENDER-BASED DIFFERENCES IN PARTICIPATION IN ADVENTURE SPORTS: A STUDY ON PARTICIPANTS IN FETHIYE PARAGLIDING

M.Sc. Merve ARSOY

### Abstract

**Summary:** A research study was conducted on individuals participating in paragliding in Fethiye.

**Objective:** The aim of the study is to determine which individuals prefer this adventure sport more. The research question seeks to identify whether men or women engage more in paragliding.

### Method

Interviews were conducted with paragliding pilots, and the question of who participates more was posed. The responses indicated that more participants were women.

### Result

As a result of this research, it was observed that women are more interested and curious about paragliding, and their participation is higher. It was also concluded that men are more reserved and indecisive in participating in these activities.
